Footnotes and Methodology

Footnotes for Placemats

* With the exception of Hospitals, this summary captures the head office locations of LHIN-funded Health Service Providers. An organization may provide services for multiple sectors across more than one sub-region. For the delivery sites of these services, please refer to the interactive Sub-region Profiles.

† Unique number of family physicians with a primary office location in the Central East LHIN. For locations of secondary and tertiary offices, please refer to the interactive Sub-region Profiles.

LHIN-funded Health Service Providers

This section displays the count of LHIN-funded Health Service Providers by sector and sub-region. An organization may receive more than one type of funding to provide services across multple sectors - the categorization of the 121 LHIN-funded Health Service Providers is based on the primary funding type for each organization.

An organization may provide services in more than one sub-region. The sub-region assignment is based on the head office location (with the exception of Hospitals). For the delivery sites of these services, please refer to the interactive Sub-region Profiles.

Population Descriptors

Sub-Region Data
For the following indicators, the sub-region statistic is displayed.
1. Low Income Population
2. Visible Minority Population
3. Immigrant Population
4. Indigenous Population

If the sub-region is ranked in the top or bottom two out of the seven sub-regions, this ranking is described.

Neighbourhood Highlights
For indicators where a neighbourhood is ranked in the top or bottom two out of all neighbouhoods (97 in total), this statistic is described. However, there are cases where the visual space on a placemat does not allow the description of all statistics that meet these criteria. For the full list of neighbourhood statistics, please refer to the interactive Sub-region Profiles.

Data Source: Census of Population, Statistics Canada, 2016

Health System Utilization

Sub-Region Data
For the following indicators, the sub-region statistic is displayed.
1. Emergency Department (ED) Utilization
2. Acute Hospitalization
3. Alternate Level of Care (ALC) Days
4. Post-acute Mental Health Utilization

If the sub-region is ranked in the top or bottom two out of the seven sub-regions, this ranking is described.

Neighbourhood Highlights
For indicators where a neighbourhood is ranked in the top or bottom two out of all neighbouhoods (97 in total), this statistic is described. However, there are cases where the visual space on a placemat does not allow the description of all statistics that meet these criteria. For the full list of neighbourhood statistics, please refer to the interactive Sub-region Profiles.

Data Sources: 2017/18 data from administrative databases such as Client Health and Related Information System (CHRIS), Discharge Abstract Database (DAD), and National Ambulatory Care Registry System (NACRS). For the full list of databases please refer to the Sub-region Profiles.

Primary Care
(Non LHIN-funded)
